

EXISTENTIAL THEORETICAL RELATIVITY

HOST Good evening. And welcome to News Makers. Our guest this evening is Dr. Reginald Splat who is best known for his breakthrough work in existential theoretical relativity. Doctor.

GUEST Pleasure to be here, David.

HOST Perhaps we can start with you telling us a little bit about what exactly is “existential theoretical relativity”.

GUEST No.

HOST Pardon?

GUEST Unless you really want me to.

HOST I really want you to.

GUEST Oh. I see. My misunderstanding. Right. Well. Existential Theoretical Relativity is, as it were, really boring.

HOST Boring?

GUEST Oh yes. As boring as putting a cat through a meat grinder.

HOST I'd find that interesting.

GUEST Right. Well. We put a cat through a meat grinder and then theorized as to if it were actually there.
